Kitzy, your 72-hour supply without the headache.

What the app does for you, screen by screen.

Swipe to find out

A supply sized for your household

Adults, children, babies, pets: Kitzy works out the water, meals and gear you need.

Six fireflies to see where you stand

Water, meals, light, warmth, care, plan. Each supply that’s ready lights one up.

Your home, and a bag for everyone

Your supply at home, a grab bag for each person if you need to leave. Kitzy reminds you before every expiry date.

A shopping list, ready to go

What's missing, where to store it, and a link to share it with your household.

Recipe ideas from your tins

Quick chilli, sardine and tomato pasta, lentil salad: a way to use up your tins before they expire.

Activities that keep your kit alive

A mini-check on the first Monday of the month, a big check-up when the clocks change, a quiz and a 72-hour family drill.

Your emergency plan, protected

Who to call, where to meet, where to turn off the water. Encrypted on your phone, it opens with your fingerprint or your code.

The right moves, made clear

Set up LU-Alert, recognise the sirens, and the official guide summed up in plain words.

Free. No account. Works offline.
